

AUTUMN 1 2025

We have developed our knowledge of place value. We have been reading, writing, ordering and comparing 4 digit numbers. We also found the nearest 10, 100 and 1000.

In DT, this half term we learned about bridges. We explored creating beam, truss, arch and suspension bridges and investigated which was the strongest. We then designed and made our own.

In History, we researched different sources to find out facts about the Romans and their impact on British Society.

We identified where the Romans appear on the timeline and compared their lives with our previous learning relating to Stone Age, Ice Age and Bronze Age.

We have been learning about the digestive system. We identified the organs linked to the digestive system and investigated what happens to food when we eat. We also learned about teeth. We named different types of teeth and identified their function. We investigated the impact of certain drinks on our teeth.

We have been doing PE with Jack from Hull KR.

We have been developing skills for tag rugby and applying these to play various games. We worked together as a team to score points and try to beat Jack!

YEAR 4 FOXES
