

SUMMER 2 2025

In Writing, we have been learning and using signifiers to help us remember the order of a family story.

We also experimented with a range of subordinating conjunctions and explored how they can change the meaning of a sentence.

In Science, we classified and group animals according to their features. We then sorted animals into vertebrates and invertebrates.

After a year of learning how to play the glockenspiels, we got to show case our skills at Connexin Live with pupils from across the city.

We had a great visit to York learning all about the Vikings. We even had lunch with Paddington!

YEAR 4 KINGFISHERS
