

SUMMER 2 2025

We learned about capacity and volume in some of our Summer maths lessons. We loved playing with the different sized equipment.

In our English lessons we enjoyed following and then writing our own instructions of how to make a sticky marmalade sandwich. They were delicious!

We had a go at learning the art form of printing. We enjoyed using different surfaces to see a range of effects. We printed Tudor houses to think about how buildings would have looked in 1666.

In History, we learned all about the Great Fire of London ... It really wasn't great! We created timelines to order the events.

We were lucky enough to have an author visit from Steve Webb.

He read us some of his stories and we helped act out parts of the books.

YEAR 2 STOATS
