

AUTUMN 1 2025

Maths

In maths we have been learning how to subitise (recognise without counting) numbers and have been exploring how many different ways we can show numbers up to 4. We have also been matching numerals to its quantity.

Physical Development

Whilst playing outside we have been able to improve our balancing skills and have had lots of fun creating complex trails with the large wooden blocks.

Communication and Language

Our mud kitchen area is a very popular place to get together and share ideas.

We have been exploring pumpkins and have used our senses to help us describe what they look, feel and smell like.

Personal, Social and Emotional Development

We have been learning to share our resources and are beginning to show that we can work together to solve problems.

Understanding the World

We have been exploring lots of new things since we began in September. We have particularly enjoyed learning all about the season 'Autumn' We looked closely at a variety of leaves after collecting some on our walk around the school grounds.

FIELD MICE
