

SUMMER 1 2025

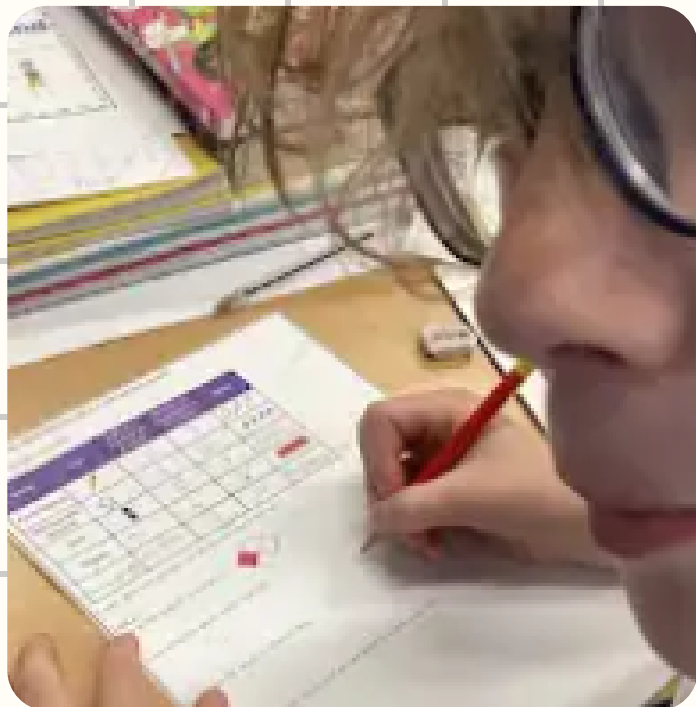

In History, we have been learning about Hull during post-WWII, including the fishing industry and the events of the Triple Trawler Tragedy in 1968.

In our art lessons, we have been exploring using different techniques to create collage art, including marbling, automatic drawing and sculpture.

Our Friday mornings have been very exciting this term! We have had a session working with the Hull KR coaching team, who have helped us build skills for track and field races and events.

In Maths, we have continued working hard to master fractions: converting, interpreting and calculating with them - it's been really tough but we have persevered and not given up!

As part of our history learning, we got to take part in a fantastic experience with Children's University, where we took part in some fantastic workshops and learned all about the events of the Triple Trawler Tragedy.
