

SPRING 2 2025

Y6 maths has focused on consolidation and revising key topics. Daily arithmetic and weekly homework is helping to build confidence.

In writing, we have used 'The Lost Thing' by Shaun Tan as inspiration. We have created our own lost things and written balanced arguments.

We have explored a range of text types in our reading comprehension lessons: focusing on language, author intentions and how the reader interprets the text.

Our science focus this half term has been light. We have investigated how light travels in straight lines from the source and when blocked creates shadows.

In PE, Barn owls have linked actions together to include a jump, balance and a travel. They considered variations to make the sequence interesting and refined their piece for a final presentation.

YEAR 6 BARN OWLS
