

SUMMER 2 2025

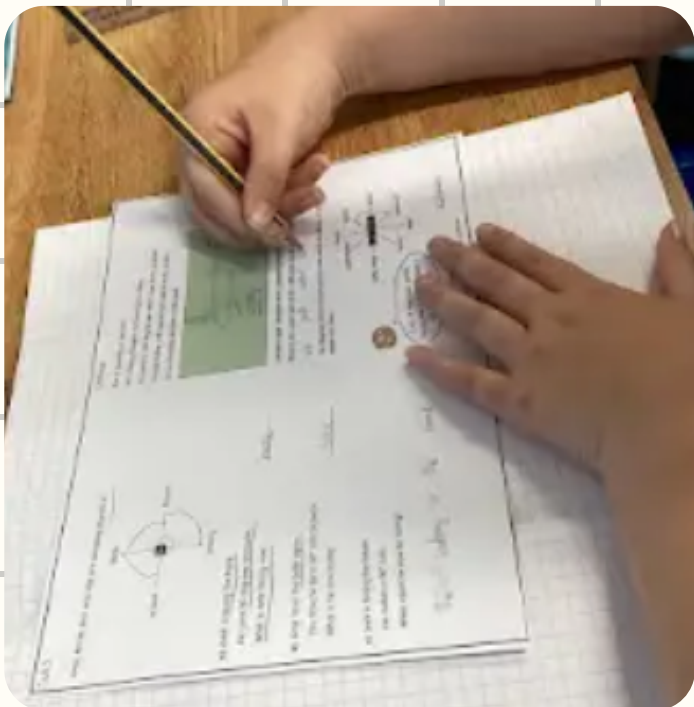

In science we have learned all about how different plants reproduce and enjoyed investigating how spring onions can even regrow roots by themselves!

Our geography topic on rivers of the UK and the world has been fascinating. We ended our topic by using old recyclables to create a 3D collage of rivers.

We have continued to develop our singing skills each week alongside the staff from Choral Hull, who have really helped us learn how to sing in a wide range of different styles and learn about the origins of music.

We have been learning all about how to use a protractor in maths; estimating, drawing and measuring a range of angles.

Challenge Cup!

We were incredibly excited to get the opportunity to meet the Challenge Cup when Hull KR came to visit. It was fantastic to learn all about this trophy's history and its relevance, as well as hear about the exciting Challenge Cup final.
