

# SPRING 2 2025

25.3.25 layers of soil

In maths, we have developed our knowledge of fractions. We enjoyed using the cubes to represent the same fraction in different ways.

In science, we also got to create chocolate soil. What a yummy way to learn the layers that make up the dirt under our feet!

In science, we have loved learning all about rocks. Our favourite was recreating the rock cycle in chocolate and then getting to eat it!

In geography, we loved learning all about Marvellous Mountains. We especially enjoyed using the Atlases to locate famous Mountain Ranges in the world.

Hook: Mad Hatter's Tea Party

To kick start our English unit, we had a crazy Mad Hatter's Tea Party.

# YEAR 3 SQUIRRELS
