

# SUMMER 1 2025

In Maths, the children have worked hard to apply strategies to help them solve multiplication problems.

In English, the children had to follow instructions on how to make cornflakes. They then wrote their own instructions to show their understanding.

We have had to design and make a wooden photo frame in DT.

We had to carefully measure and then saw each piece of wood before painting our photo frames to match our designs.

In Geography, the Stoats learned all about Freetown, a city in Sierra Leone, Africa. We even had some of our questions answered by a Freetown expert to help us find out more information.

HKR players (and Coach Jack!) visited our class, and we asked them some questions about their jobs as rugby players. We couldn't believe they have to attend every match!

## YEAR 2 OTTERS
