

SUMMER 2 2025

Maths

In Maths we have continued to develop our understanding of doubling facts and also which numbers go together to make 10. We explored odds and even numbers and enjoyed playing games to help us with our addition and subtraction skills. We also loved using the Rekenreks as a learning tool.

Literacy

In Drawing Club we used our knowledge of characters and settings and our imaginations to create our own stories based on the stories we read this term. Elmer and The Rainbow Fish were our favorites. We also enjoyed our daily phonics sessions learning our set and set sounds.

Expressive Arts and Design

We have linked our creative work to the books that we have enjoyed this half term. We have created animals print art work and used our musical instruments to play African music. The children made their own binoculars so that they could go on a safari and they enjoyed creating their own rainbow fish with beautiful colourful scales.

Personal, Social and Emotional Development

We have been learning all about how we change over time and created a time line of our life. We discussed healthy food options to enable us to stay healthy as we grow. We have also been discussing how we will all be in a new class in the next academic year and talked about our hopes and worries as a class. We met with our new teacher and enjoyed spending some time with her.

Understanding the World

This half term we have been learning about lifecycles. We explored butterflies and frogs. We also learnt lots of facts about bees such as not all bees make honey and that bees have 5 eyes. We enjoyed putting on a special suit that protects us from the bees and tasted some honey that the bees produced. We looked at maps then read the story 'We All Went On Safari' then explored a wide range of African animals and their environment.

FS2 FIELD MICE CLASS
